

## Earth Vision

### Description

JAXA API is a platform for satellite data analysis and visualization. It provides a comprehensive suite of tools and services for processing and analyzing satellite imagery and sensor data.

- **Cloud-based architecture**: The platform is built on a cloud-based architecture, allowing for scalable and flexible data processing and storage.
- **Pivot Service**: The platform offers a Pivot Service that enables users to quickly and easily analyze and visualize data from multiple sources.
- **Integration with other services**: The platform is designed to integrate with other services and tools, providing a seamless workflow for data analysis and visualization.

The platform is designed to be user-friendly and accessible to a wide range of users, from researchers and scientists to students and hobbyists.

The platform is available as a web-based application, making it easy to access from anywhere, anytime.

- **Radio Mind**: A service that provides real-time data and analysis for various satellite sensors.
- **World Eye**: A service that provides high-resolution satellite imagery and data for various regions of the world.
- **Earth Vision**: The core platform for satellite data analysis and visualization.
- **Discord**: A community chat platform for users to discuss and share their work with the platform.
- **ZIKUU Research Library**: A library of research papers and articles related to satellite data analysis and visualization.

The platform is designed to be a one-stop solution for all your satellite data needs.

- **Pivot Service**: A service that provides a central hub for data analysis and visualization.

The platform is designed to be a one-stop solution for all your satellite data needs.

The platform is designed to be a one-stop solution for all your satellite data needs.

The platform is designed to be a one-stop solution for all your satellite data needs.

- **Integration with other services**: The platform is designed to integrate with other services and tools, providing a seamless workflow for data analysis and visualization.
