Dokku PaaS Platform as a Service Heroku-like environment for Docker containers. It allows you to deploy applications from source code repositories like GitHub or GitLab. The interface is simple and easy to use, making it a popular choice for small businesses and developers.

Git push to deploy your application to the production environment. The command is simple and easy to remember. The output shows the progress of the deployment and the final status of the application.

```
$ git push dokku main
```

```
Enumerating objects: 174, done.
