The image shows a VS Code editor window titled "docker-compose.yml - vstreamer - VSCode". The editor displays a Docker Compose file named "docker-compose.yml". The file content is as follows:

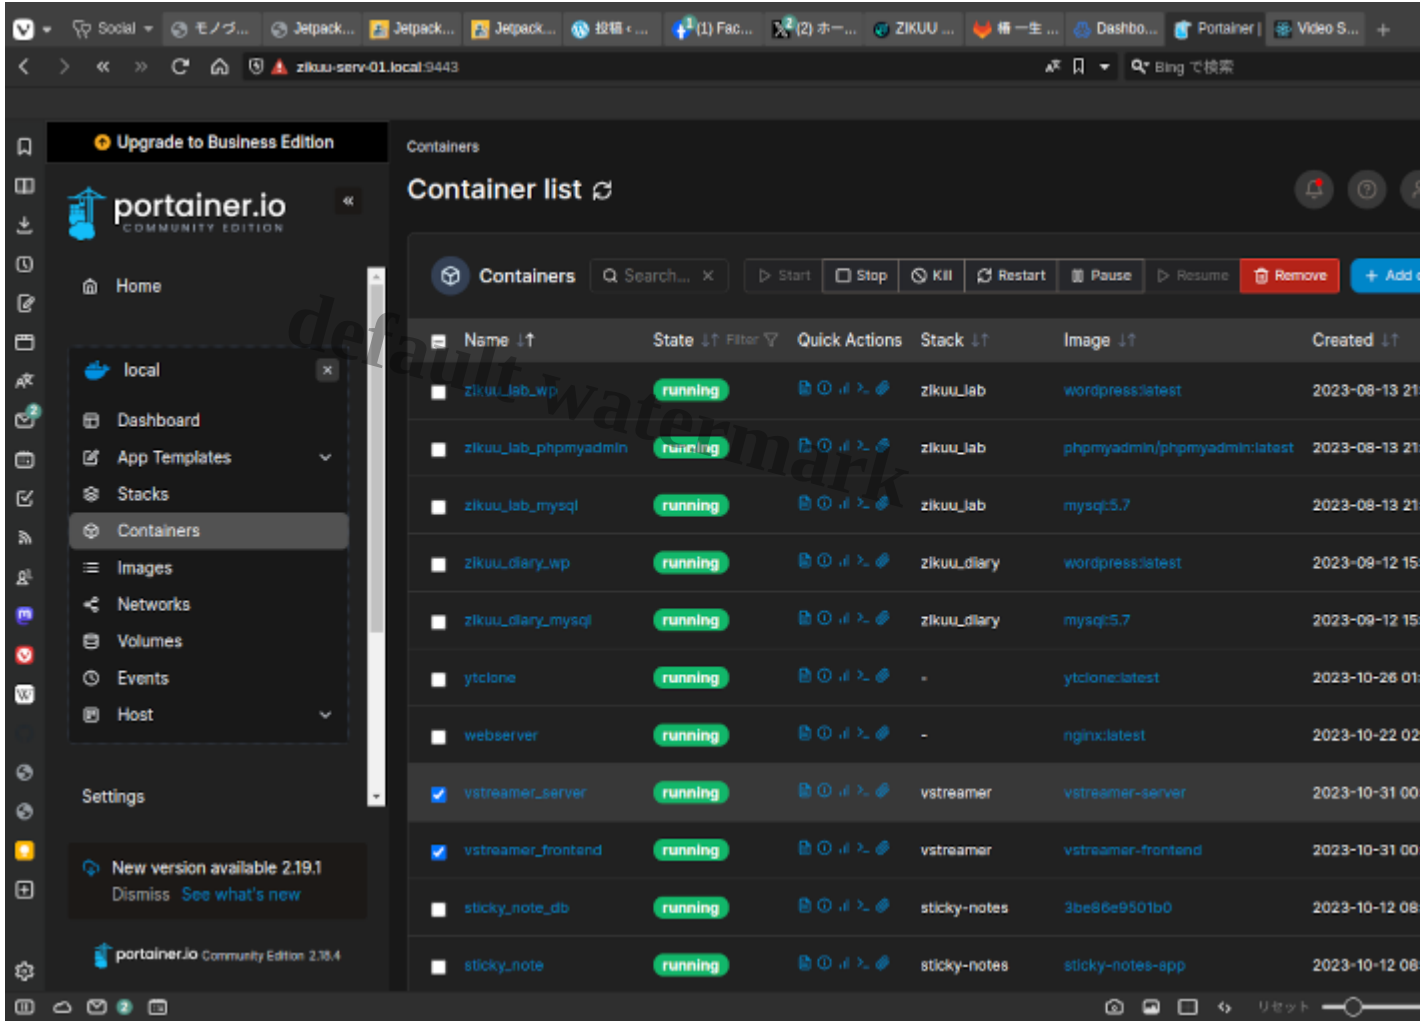

```
version: "3.7"
services:
  server:
    build: server/
    container_name: vstreamer_server
    restart: unless-stopped
    ports:
      - 4001:4001
    networks:
      - vstreamer
    volumes:
      - ./server/assets:/usr/src/app/assets
  frontend:
    build: frontend/
    container_name: vstreamer_frontend
    restart: unless-stopped
    depends_on:
      - server
    ports:
      - 3003:3000
    networks:
      - vstreamer
    links:
      - server
networks:
  vstreamer:
```

The VS Code interface includes a sidebar on the left with icons for Explorer, Search, Source Control, Run and Debug, and Extensions. The Explorer view shows the project structure with folders "VSTREAMER", "frontend", and "server", and files ".gitignore", "docker-compose.yml", and "README.md". The Run and Debug view shows the "main" configuration. The status bar at the bottom indicates the current line and column: "行 19, 列 12".

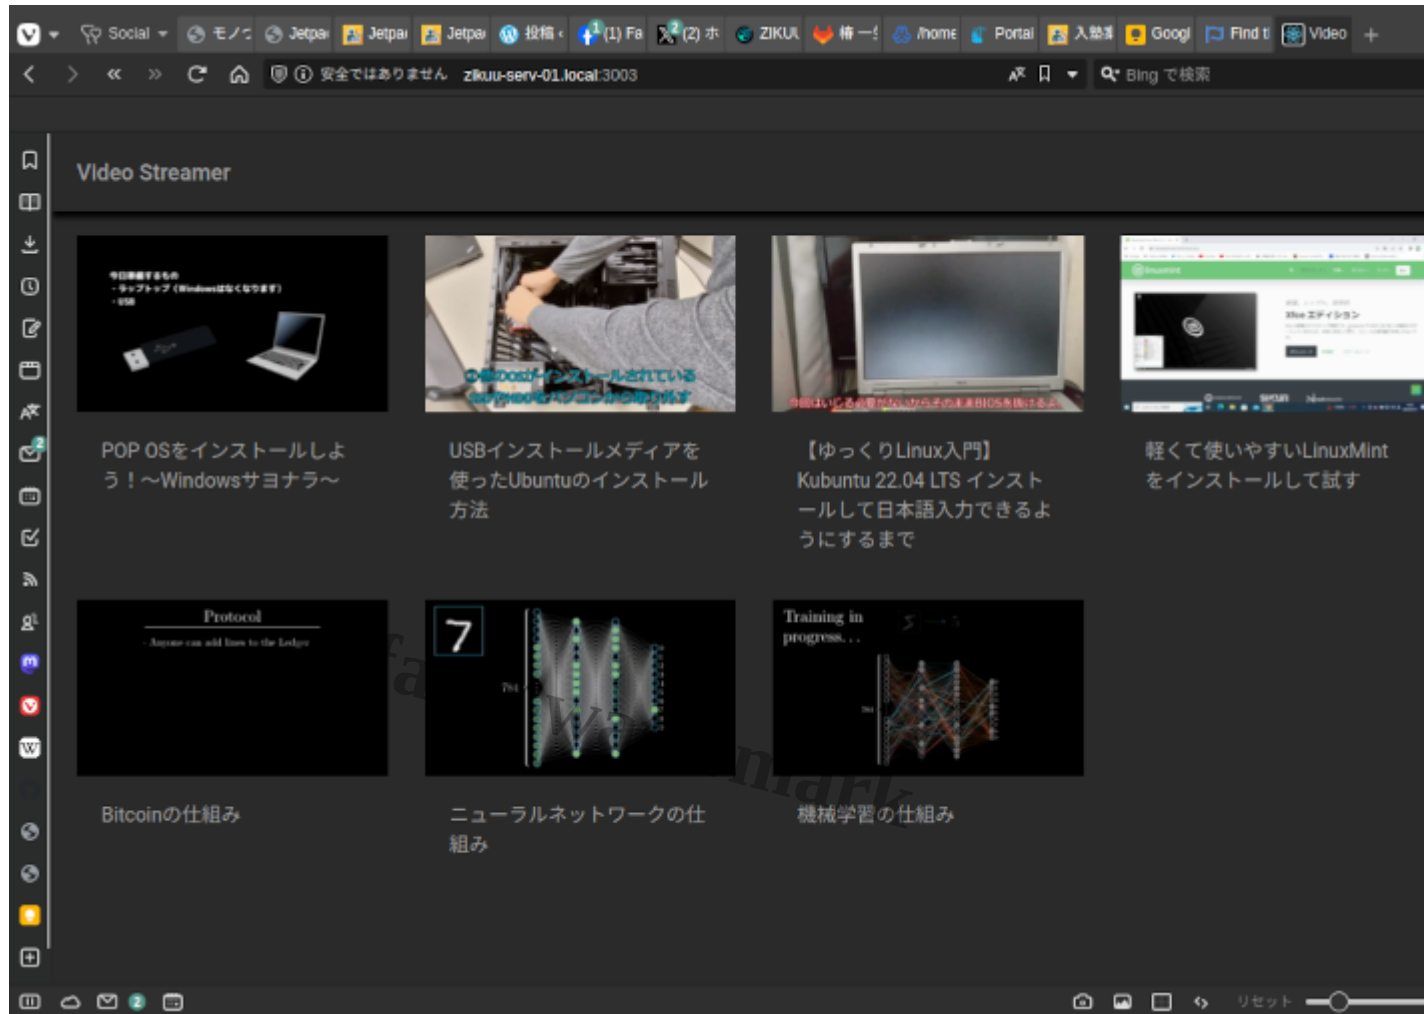

Footer Tagline

```
docker compose up -d
```
